

Environmental Policy

The organisers of the Junior 1000 Ecosse Challenge accept that its operations can have harmful effects on the local environment. We are committed to conducting our activities in a way which provides for a sustainable future for our sport without unnecessary compromise of the environment.

We will endeavour to minimise environmental impact by:

- Encouraging our championship participants to comply with event environmental policies.
- Complying with applicable legal requirements which relate to environmental impacts.
- Preventing pollution, reducing waste, and minimising the consumption of resources.
- Educating, training and motivating representatives, officials, and competitors to carry out tasks in an environmentally responsible manner.
- Being committed to continual improvement of environmental performance.

This policy will be communicated to all representatives, officials, and competitors associated with the Championship and will be available to third parties on our website.

This policy will be monitored regularly and updated where necessary.
